

FORT LAUDERDALE BOAT SHOW BOOTH 514 / AC Tent next to Mega Yachts

# Welcome to the Future

INTRODUCING THE

## MPW Filter

the most innovative fuel and water separator designed for all diesel engines, *including* the more demanding Tier 4 and Tier 5 engines.

With the demand for better filtration, our unit can be modified to handle any engine specification and flow rates with a minimum amount of restriction.

### Overall Filter Unit

- Flow rate to size (200 to 1600 GPH)
- 5 Stages of Separation prior to Filter Element
- Filter Element sizes 2, 10 or 30 Micron Absolute rating
- 2 Cleanable Stainless Steel Mesh Elements 60 and 230 Micron
- Less space required for service and simplicity of service
- Custom elements and Strainers designed to meet your OEM's
- Multi Fuel Use (Diesel, Gas, Jet A and Bio-Fuels)
- Impact resistance Clear Bowls

### Lowest Amount of Restriction (Delta P)

- Quicker acceleration and better throttle response
- Engineers can see the difference and so will you

### Cast Aluminum Construction & Stainless Steel Construction Available (SOLAS)

- Stainless steel hardware on all units

### Switchable Units

- 3 way REBUILDABLE stainless steel valve
- True switchable filter or combine flow for larger engines
- Switchable Valves can be added at any time

### Available Options:

- Water Sensors Or Potential Free Alarm
- Heat shields (USCG Excepted)
- Metal bowls (ABS and Solas Excepted)
- Vacuum Gauges
- Clear bowl - Clear Bowl and Heat Shield-Aluminum Bowls

Patent Pending
